SUMMARY

Full-Stack Engineer building AI-integrated web systems. B.Tech CSE student (CGPA 8.84) with 3 engineering internships, 7+ deployed applications, and 1860+ competitive programming problems solved. Experienced shipping production-grade REST APIs, workflow automation backends, and React frontends. CodeChef 3-Star; Hackathon Prayatna 2.0 Runner-Up.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL, PL/SQL, C, Java

Frontend: React.js, Next.js, Vite, Tailwind CSS, HTML5, CSS3, Redux, Framer Motion, Responsive Design

Backend: Node.js, Express.js, Flask, REST APIs, JWT Authentication, WebSockets, PDF Parsing, OCR

Databases: MongoDB, PostgreSQL, Supabase, Redis, Firebase Firestore, SQL

AI / ML: TensorFlow, Keras, Scikit-learn, Gemini API, OpenAI API, Pinecone, RAG, LLM Integration, Pandas, NumPy

DevOps & Tools: Git, GitHub Actions, Docker, CI/CD, Render, Vercel, Postman, Agile/Scrum

CS Fundamentals: Data Structures & Algorithms, System Design, DBMS, OOP, Operating Systems, Computer Networks

WORK EXPERIENCE

AI Engineering Intern

Oct 2025 – Dec 2025

Infosys Springboard

Remote

- Built [Pawdentify](#), a CNN classifier (TensorFlow/Keras) trained on 120 breed classes, achieving **86.8% top-1 accuracy**; deployed as a Flask REST API with sub-200ms inference latency.
- Improved model generalisation by ~15% via transfer learning and data augmentation pipelines, reducing validation-set overfitting.
- Integrated an OpenAI-powered pipeline to auto-generate breed-specific care content; end-to-end product tested with 50+ beta users.
- Authored end-to-end ML documentation (preprocessing → training → evaluation → deployment) adopted as team reproducibility standard.

Web Development Intern

May 2025 – Jun 2025

SkillDzire

Remote

- Refactored 10+ responsive UI components (HTML5/CSS3/JS), improving Lighthouse performance score and cutting page-load time by ~20%.
- Managed Git feature branches and PR reviews in a 4-person Agile team; streamlined CI/CD pipeline, compressing release cycle time by ~30%.

MERN Stack Developer Intern

Feb 2025 – Mar 2025

CodeC Technologies

Remote

- Delivered 3 full-stack MERN applications with JWT authentication, RESTful APIs, and dynamic dashboards across 2 Agile sprints with zero critical production bugs.
- Designed MongoDB aggregation pipelines on Express.js services, reducing average API response time by ~25% on data-heavy endpoints.

PROJECTS

HireScale AI | *React, TypeScript, Node.js, Express, Supabase, Redis, Gemini Pro* | [GitHub](#)

- Built a stateful recruitment platform with ATS resume scoring, adaptive interview workflow orchestration, and session memory persistence across multi-turn conversations.
- Engineered hybrid evaluation engine combining rule-based scoring with Gemini Pro LLM inference — enabling structured candidate assessment with explainable outputs.
- Designed real-time hiring analytics dashboard backed by Supabase (PostgreSQL) and Redis for session state management and low-latency API coordination.
- Deployed full-stack architecture (React + TypeScript frontend, Express.js backend) on Vercel with environment-based configuration and CI/CD via GitHub Actions.

RecoveryMate | *React, Node.js, Express, MongoDB, Gemini API, Pinecone, Twilio, OCR* | [GitHub](#)

- Built an invoice recovery automation platform for SMBs — end-to-end workflow covering WhatsApp outreach (Twilio), debtor intent classification, and real-time collection dashboards.
- Implemented LLM-powered reply classification pipeline (Gemini API) categorising responses as promise, dispute, or info-request with ~90% accuracy, driving automated invoice state transitions.
- Designed RAG-based dispute resolution system using Pinecone vector retrieval and policy documents, reducing manual response-drafting time by ~70%.
- Built invoice ingestion pipeline with PDF parsing, OCR, regex fallback, and data normalisation — achieving ~85%+ structured extraction accuracy across varied invoice formats.

RestaurantFlow | *React 18, Vite, React Context, Framer Motion*

- Developed an operational restaurant workflow system managing full order lifecycle across kitchen, server, and admin interfaces with real-time state synchronisation.
- Modelled multi-stage order state machine with cross-role coordination and inventory/admin hooks — demonstrating systems-oriented frontend engineering and workflow design.

Pawdentify | *Python, TensorFlow, Keras, Flask, OpenAI API* | [GitHub](#)

- Built CNN classifier on 120-breed dataset achieving 86.8% top-1 accuracy with transfer learning; deployed as Flask REST API with sub-200ms inference latency.
- Integrated OpenAI API for breed-specific care content generation — combined CV + LLM inference pipeline tested with 50+ beta users.

Learn Spark Academy | *React.js, Node.js, ElevenLabs API*

- Built voice-first EdTech platform with gamified quizzes, flashcards, and adaptive learning paths, using ElevenLabs API for natural text-to-speech accessibility.

StockEase | *React, Node.js, MongoDB, ElevenLabs API*

- Prototype inventory management system with multilingual voice interactions and AI-assisted stock tracking workflows built on the MERN stack.

EDUCATION

B.Tech in Computer Science & Engineering	2023 – 2027 (Expected)
<i>Sasi Institute of Technology & Engineering, Tadepalligudem</i>	<i>CGPA: 8.84 / 10</i>
Intermediate (MPC)	2021 – 2023
<i>Sasi Junior College, Tadepalligudem</i>	<i>Score: 892 / 1000</i>

ACHIEVEMENTS & LEADERSHIP

Competitive Programming: CodeChef 3-Star (1,860+ problems solved) | LeetCode active — consistent algorithmic problem solving across DSA topics.

Runner-Up, Hackathon Prayatna 2.0 (50+ teams) — shipped a complete full-stack product end-to-end within 24 hours.

Runner-Up, IEEE Student Branch Quiz — Top 3 of 40 competing teams.

Point of Contact, Corporate Committee — **Inspira 2025** (300+ attendees); coordinated Hackathon (200+ students), Codeathon (100+), and Ideathon (50+ ideas).

ACM Program Coordinator — Organised TechWar Tech Event (120+ attendees); delivered CS career mentorship to 60+ students at ZP High Schools.

CERTIFICATIONS

Python for Everybody — University of Michigan, Coursera | 2025

Python Data Structures — University of Michigan, Coursera | 2025

Front-End & Web Development — IBM, Coursera | 2025

SQL & Relational Databases 101 — IBM Cognitive Class | 2025

OOP in Python | Advanced Python | PL/SQL | 500+ Problems Certificate — CodeChef | 2024–2025
